Security quality ratings are derived from underlying portfolio securities by using the middle rating of Standard & Poor's, Moody's and Fitch. If only two of Standard & Poor's, Moody's and Fitch rates a security the lower of the two is selected. If only one of Standard & Poor's, Moody's and Fitch rates a security the available rating is used. Ratings by any agency represent an opinion only, not a recommendation to buy or sell. Securities that are not rated by any agencies are reflected as Not Rated "NR."
